

Comfortable

SomnoMed® oral devices are customized to your dentition and fitted by a sleep dentist to maximize comfort. With a SomnoMed® device, you can easily talk, drink, and fully close your mouth, all while enjoying a discreet and silent treatment for your sleep apnea.

High Quality

Crafted from top-grade, durable acrylic, your SomnoMed® device is designed to maintain its functionality over time. Our proprietary soft inner **b-flex** Comfort Liner™ provides an added layer of comfort, ensuring a premium experience. Each device comes with a multi-year warranty for lasting peace of mind.

Clinically Proven

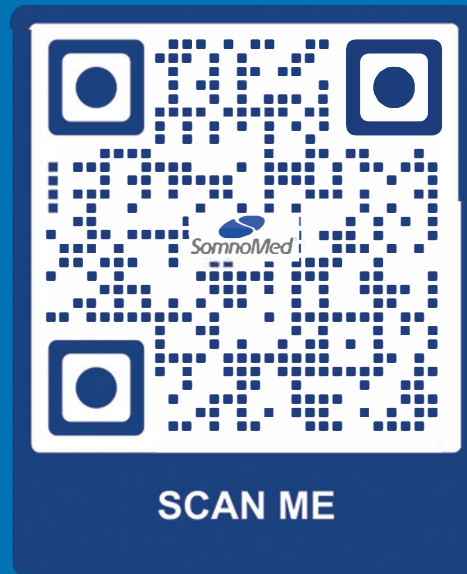

SomnoMed® is committed to delivering results backed by science. Supported by multiple clinical studies, our devices are trusted and validated within the medical and dental communities. When patients try both CPAP and a SomnoMed® device, 3 out of 4 of them prefer a SomnoMed® device*.

Accessible

Obstructive Sleep Apnea (OSA) is a recognized medical condition, meaning the cost of your SomnoMed® device is typically covered under medical insurance.

Treatment Focused | Technology Driven

Your Journey To A Better Night's Sleep

Your journey begins with your physician, who, after diagnosing Obstructive Sleep Apnea (OSA), will likely discuss treatment options with you. If oral appliance therapy with a SomnoMed® device is a solution for you, a SomnoMed® Patient Care Coordinator will guide you through every step of the process.

Your Dental Consultation

During your visit with a qualified sleep dentist, they will take a precise impression or digital scan of your teeth. This will be sent to SomnoMed® to create your customized device.

Fitting Your Device

SomnoMed® devices gently reposition your lower jaw to open your airway, allowing you to breathe naturally and sleep better. Once your device is ready, your sleep dentist will schedule an appointment to fit the device and provide instructions on its use and care.

Follow-Up With Your Physician

To confirm the success of your treatment, your physician or clinic may conduct a follow-up sleep study, ensuring your journey to better sleep stays on track.

Sweet Dreams

With SomnoMed® devices, over a million people worldwide have reclaimed their energy and rediscovered the joy of truly restful sleep. Now it's your turn to wake up refreshed and ready to take on the day!

Available SomnoMed Devices
