FY 25 Trading Update

Trading in the first 8 weeks of FY25 has seen revenue up approximately 20% year-on-year, on the back of the reduction of backlog and strong sales results. There is an expectation that growth will slow in the remaining quarters as the backlog is cleared. We have factored these dynamics into the FY25 guidance.

¹ EBITDA does not include AASB16 lease payments, share/option expenses, unrealised forex gain/(loss), one off restructuring costs and discontinued operations

Rest Assure® Update

The Company is continuing to work through areas for which the US FDA has requested further information and expects to provide its response to the FDA by early September 2024. Upon receipt of the FDA's response, the Company will then assess a global beta market entry in 2025.
